ZigBee Appliance Module RD77715 has CT(current transformer) and Relay and measurement function.

Appliance Gauge RD77711 and Energy Sensor LSM1E103T0 have CT(current transformer) and measurement function, but no relay. But both have own housing .

ZigBee Extender RD77721 has no CT(current transformer) and Relay and measurement function.

RD77715/RD77711/RD77721/LSM1E103T0 share a schematic circuit and a PCB board. only they have difference in Bom.
